Assessment – How It Works

Complete a simple set of questions for yourself or your patients and get an instant score and report.

Assessments provide an instant score and a detailed report to help you understand your health better.

1 Open Assessment

From your CareVR Dashboard, click Assessment in Quick Actions.

The screenshot shows the CareVR dashboard. At the top, there's a navigation bar with 'Family' and 'Self' tabs, and 'Home' and 'SP' buttons. Below this, 'Your Patients (2/2)' are listed: K V Premnath (77, Male) and Prasanna Premnath (74, Female). A 'Latest Health Snapshot' section displays four metrics: Blood Pressure (128 / 82 mmHg), Heart Rate (72 bpm), Weight (68.5 kg), and Temperature (98.4 °F). A 'Quick Actions' section at the bottom has four buttons: 'Record Health' (Track health information for your family), 'Assessment' (Complete assessments and view results), 'Doctor's Notes' (View and manage doctor's notes), and 'Health Timeline' (See your families health history). The 'Assessment' button is highlighted with a mouse cursor.

2 Start Assessment

Select the patient (yourself or any family member) and click Start Assessment.

The screenshot shows the 'Start Assessment' screen. It has a 'Health Assessment' header. Under 'Select Patient', there are two options: 'Self (You)' and a list of patients: K V Premnath (77, Male) and Prasanna Premnath (74, Female). A large 'Start Assessment' button is at the bottom right. To the right of the button, there's a document icon and the text 'Health Assessment' followed by 'A set of simple questions to understand your current health status.'

3 Answer Questions

Go through a series of questions about your health. Answer each question and click Next.

The screenshot shows the 'Answer Questions' screen. It has a progress bar at the top indicating 'Assessment - Question 3 of 10'. The question is 'In the past 2 weeks, how would you rate your overall energy level?'. There are five radio button options: 'Very good', 'Good' (which is selected), 'Average', 'Low', and 'Very low'. At the bottom, there are 'Previous' and 'Next' buttons.

4 Finish Assessment

Once you have answered all the questions, click Finish Assessment.

The screenshot shows the 'Finish Assessment' screen. It features a large document icon and the text 'You have completed all the questions!'. At the bottom, there is a prominent 'Finish Assessment' button.

5 Instant Results & Report

You will get an immediate score and a detailed report. You can download the report for quick access.

The screenshot shows the 'Instant Results & Report' screen. It displays 'Your Assessment Results' with a large circular gauge showing a score of '78 out of 100' and the label 'Good'. Below this, it says 'Your overall health is stable. Keep up the good habits!'. There is an 'Assessment Report' section with a document icon and the text 'A detailed report with your responses, score and recommendations.' At the bottom, there is a 'Download Report (PDF)' button with a download icon.

What It Includes

- ✓ A series of simple, easy-to-answer questions
- ✓ Assess your current health status
- ✓ Get an immediate score and report
- ✓ Download the report for quick access

Why It Helps

- ✓ Understand your current health better
- ✓ Identify areas to focus on
- ✓ Track progress over time
- ✓ Share the report with your doctor if needed

Important - Access to CareVR is only via invitation.

Link Validity

This invitation link is valid for 7 days from creation.

One-time use

The activation link is **single use only**. Forwarded link won't work once link is accepted.

Secure journey

Your information is private and secure at every step with CareVR.

Manage patient details anytime

You can view and manage the details of your patients from the Patients section.

Secure and private

All patient information is encrypted and protected to ensure your family's data remains secure and private.

Managing Your Care Family

@2026 Copyright Linearise AI Labs

CareVR Roles, Responsibilities and Access

Different roles, different access — working together for better care.

Each role has specific responsibilities and access to keep your family's health information secure and private.

Primary

Family Owner and Care Manager

The **Primary Family Member** establishes a CareVR family and assumes primary responsibility for managing the family's CareVR access.

Key Responsibilities

- ✓ Create and manage the CareVR family
- ✓ Invite family members, caretakers and doctors
- ✓ Add and manage patients
- ✓ Manage access and permissions
- ✓ Ensure consent and security settings

Access (Per Patient)

Record Health

Assessment

Doctor's Notes

Patient Management
(Manage access and permissions)

Full access to all features for all authorized patients.

Secondary Family Member

Family Care Partner

A Secondary Family Member is a family member who is given access by the Primary to support the care and well-being of the family's patients.

Key Responsibilities

- ✓ View and record health information
- ✓ Complete assessments
- ✓ View reports and trends
- ✓ Support day-to-day care
- ✓ Add and manage patients
- ✓ Cannot manage access or invite others

Access (Per Patient)

Record Health

Patient Management
(Add and manage patients)

Access Management
(Not available)

Can add and manage patients.
Cannot manage access or invite others.

Caretaker

Trusted Care Support

A **Caretaker** is a trusted individual who is given access by the Primary to help with the care and health management of the family's patients.

Key Responsibilities

- ✓ View and record health information
- ✓ Complete assessments
- ✓ View reports and trends
- ✓ Support daily care activities
- ✓ Add and manage patients
- ✓ Cannot manage access or invite others

Cannot manage access or invite others.
No access to Health Timeline.

Doctor

Healthcare Professional

A **Doctor** is a healthcare professional who is given access by the Primary to view relevant reports and add their clinical notes for the patient.

Key Responsibilities

- ✓ View patient reports and trends
- ✓ Add and manage doctor's notes
- ✓ Support clinical care
- ✓ Cannot record health information
- ✓ Cannot complete assessments
- ✓ Cannot manage access or invite others

Access (Per Patient)

Invitation is required

You must receive and accept an invitation email from CareVR to create your account. Without an invitation, you may find it difficult to log in to CareVR.

Link validity

The invitation link is valid for **7 days** from creation.

One-time use

The activation link is **single-use**. Please do not share it with anyone else.

Secure and private

Your information is private and secure at every step with CareVR.

Important Guidelines for Using CareVR

A few key things to know to get the best experience with CareVR.

These guidelines will help you use CareVR easily, securely and with the right access for your role.

1 Invitations

CareVR works only via invitations

CareVR is an invitation-only application. You can access the app only if you receive an invitation from an existing CareVR user or from Linearise AI Labs.

How it works

- 1 Receive an email invitation with a secure link.
- 2 Click the link and complete the registration process.
- 3 Set your 6-digit PIN and provide consent to start using CareVR.

You're invited to CareVR

Join to manage and monitor your family's health.

Accept Invitation

2 PIN

Important to set your 6-digit PIN.

During your first login, you will be asked to set a 6-digit PIN. This PIN is required for every login to keep your account and health information secure.

Key points

- ✓ Set a 6-digit PIN of your choice.
- ✓ Keep your PIN private.
- ✓ You will use this PIN during secure login verification.
- ✓ Your PIN helps protect your health information and access rights.

Create your 6-digit PIN

• • • • • •

Continue

3 Toggle (Self / Family)

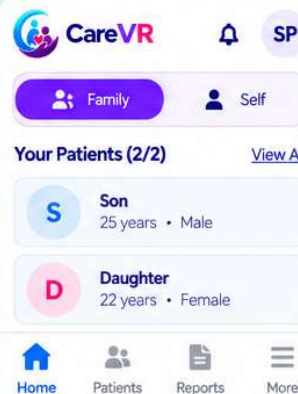

Easy to view and manage yourself or your family members.

The profile toggle allows you to easily switch between your own (Self) profile and the profiles of your family members (patients) that you have access to, without logging out.

Where to find it

Use the toggle at the top of the dashboard to switch between Self and Family.

4 Initials Menu

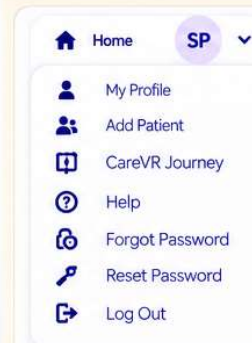

Quick access to important options and settings.

Your initials, shown at the top right, give you quick access to useful options and settings.

What you can do

- ✓ View your profile
- ✓ Add a patient (if available)
- ✓ Access CareVR Journey
- ✓ Get help and support
- ✓ Reset or change password
- ✓ Log out

5 Switch Profile

For invited Doctors, Caretakers and Secondary Family Members who want to also perform the Primary role.

Switch Profile allows you to keep your original invited role (Doctor, Caretaker or Secondary Family Member) and also access the Primary role to monitor your family members.

How it works

- 1 Click Switch Profile from the initials menu.
- 2 A confirmation is taken to ensure you are ok to perform the Primary role.
- 3 You will be logged out and asked to log in again.
- 4 After login, choose between your original profile and your Primary profile.
- 5 Your dashboard, modules, permissions and available patients will change based on the profile you select.

Secure

Invitation-based access and 6-digit PIN protection keep your information safe and private.

Simple

Easy to use features for you and your family.

Convenient

One login with profile toggle for self and family, and the option to also access the Primary role.

Empowering

Manage and monitor your family's health with confidence.

Session Management in CareVR

Your information stays private and secure, even when you step away.

For your safety and privacy, CareVR automatically logs you off after a period of inactivity.

Automatic Session Timeout

If there is no activity for **30 seconds**, CareVR will automatically log you off.

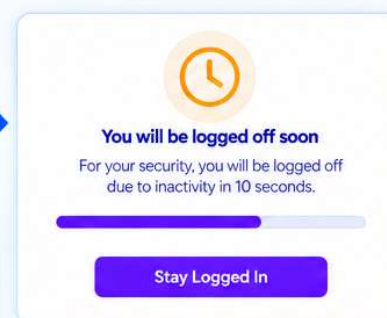

1 Active Session

You are actively using CareVR (e.g., viewing, recording or adding information).

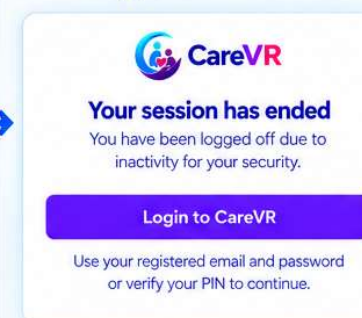

2 Inactivity Detected

If there is no activity for 30 seconds, a warning message will be shown.

3 Session Ended

If there is still no activity, CareVR will automatically log you off.

Why This Matters

- ✓ Keeps your sensitive health information private.
- ✓ Prevents unauthorised access if you step away.
- ✓ Automatically protects your account without any action needed from you.
- ✓ You can easily log in again using your email and password or verify your PIN.

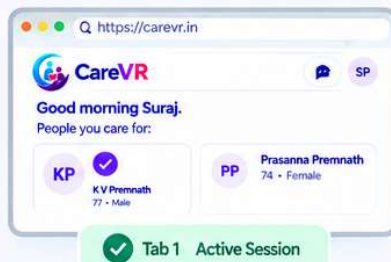

Tab Management

CareVR allows only one active session at a time for your security. If you open CareVR in another tab or window, the previous session will be ended.

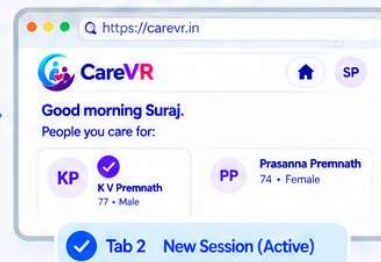

1 Login in First Tab

You log in to CareVR in a browser tab and start using the application.

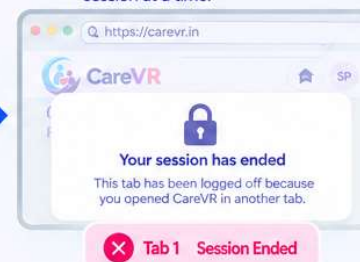

2 Open CareVR in Another Tab

When you open CareVR in a new tab or window and log in again, the new session will become active.

3 Previous Tab Logged Off

The first tab will be automatically logged off to ensure only one active session at a time.

Why This Is Important

- ✓ Prevents multiple active sessions and reduces security risks.
- ✓ Helps protect your personal and family health information.
- ✓ Ensures that if you open CareVR on another device or tab, your previous session is safely closed.
- ✓ You can simply continue using the latest tab where you are logged in.

Switch Profile in CareVR

One login. Dual profiles. Maximum flexibility with complete security.

Keep your original role and also perform the Primary role to monitor your family members.

What is Switch Profile?

Switch Profile is a benefit extended to invited Doctors, Caretakers and Secondary Family Members who want to also perform the Primary role and monitor their family members.

You can retain your original invited role while also having a Primary profile.

Who can use it?

Doctor

Caretaker

Secondary Family Member

Switch Profile is available only for invited Doctors, Caretakers and Secondary Family Members who want to perform the Primary role.

Why is it given?

To make it easy for you to monitor your family members while also retaining your original role, without creating a new account and without compromising on security.

Key Benefits

Maximum Security

Authorised access with role-based permissions.

One Login, Dual Profiles

Access both your original profile and Primary profile with the same login.

Role-Based Experience

Your dashboard, modules, permissions and patient access will change based on the profile you select.

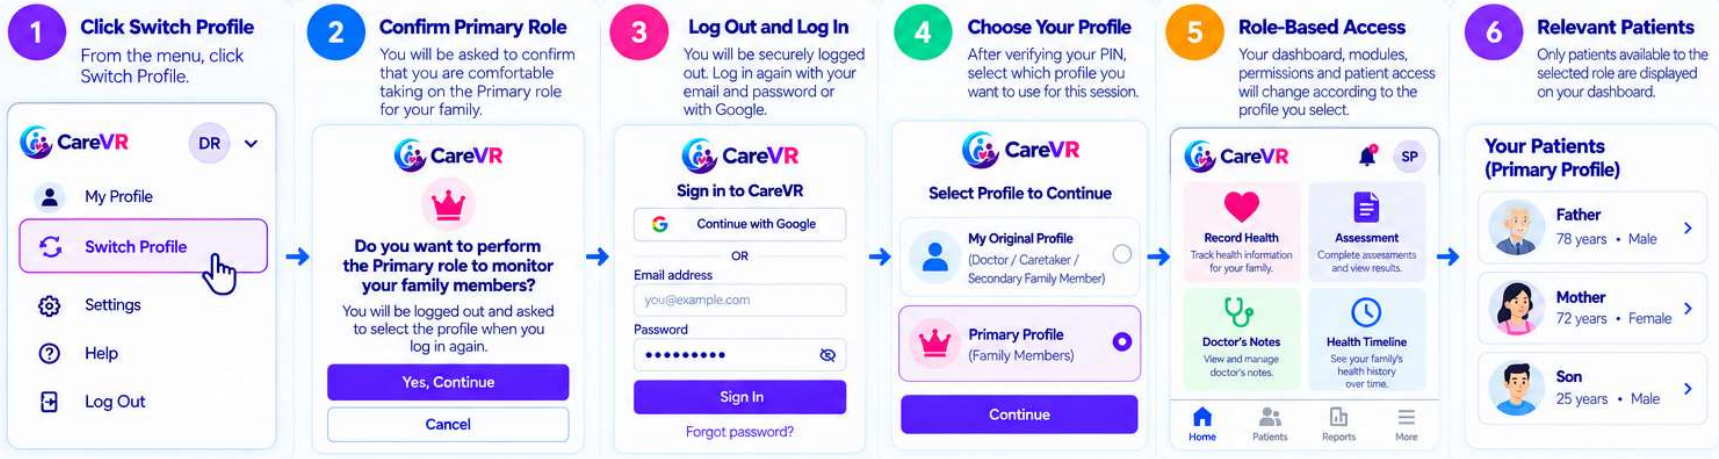

Relevant Patients

You will see only the patients relevant to the role you are playing.

How It Works

A simple and secure process to switch between your original profile and the Primary role.

Your information is secure

Protected with your 6-digit PIN, encryption and role-based access.

One login, dual profiles

Access both your original invited role and Primary profile with the same login.

A better way to stay connected

Switch Profile helps you take an active role in your family's health while keeping everything secure and easy to use.

The “How to” Question?

Wow!
This is so cool!

**I also need to
become Primary...**
How do I do it?

Oh yes, I remember!
I can Switch Profile and
take on the Primary role.

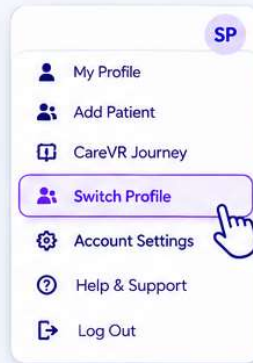

Let me do
it now...

One login. Dual profiles.
Keep your original role and
also use the Primary role
to manage your family.

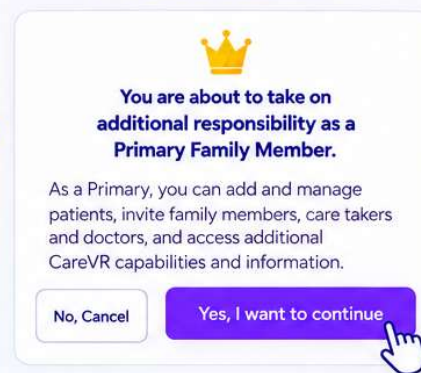

- 1 Click on your initials**
On the CareVR dashboard,
click on your initials at the top right.

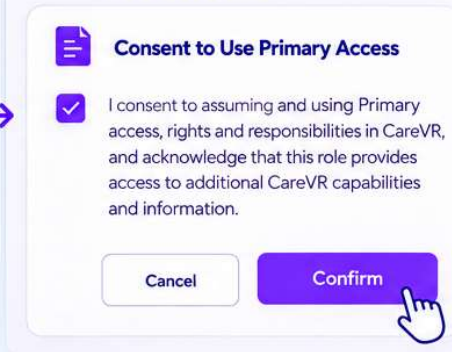

- 2 Select Switch Profile**
From the menu, click
Switch Profile.

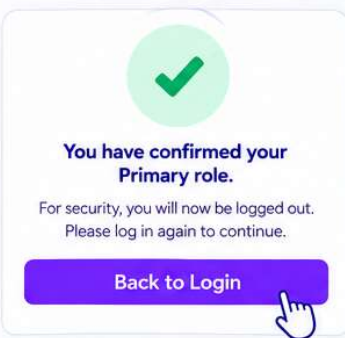

- 3 Confirm Primary Role**
A confirmation screen will be shown.
Click **Yes, I want to continue**.

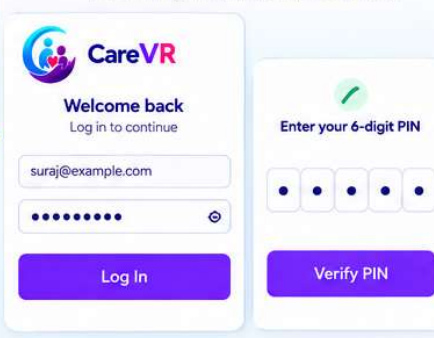

- 4 Give Consent**
Read and select the consent checkbox.
The Confirm button will be enabled after
you check the box.

- 5 Back to Login**
After confirmation, you will be logged out
and taken to the login screen. Click Log In.

- 6 Log in again**
Log in with your email and password
(or Google) and verify your 6-digit PIN.

- 7 Choose Profile**
After login, choose the profile
you want to use (your original role
or Primary role).

- 8 Access Your Dashboard**
You will be taken to your CareVR dashboard
with the selected profile (Primary).

 Continue with Google

The **captcha** helps keep your
CareVR account safe and secure.

Stops fake logins

It helps prevent automated computer programs (bots) from trying to log in.

Blocks misuse

It reduces the risk of hackers attempting thousands of login attempts to guess passwords or break into accounts.

Keeps your data safe

By allowing only real people to log in, it protects your personal and family health information.

A small step for a safer CareVR

It takes just a few seconds and helps ensure a safer, more reliable experience for you and your loved ones.

FAQ

@2026 Copyright Linearise AI Labs

Frequently Asked Questions (FAQ)

Quick answers to common questions about CareVR.

Still have questions?

Reach out to lineariseailabs@gmail.com

1

Is my data secure?

Yes. Your data is private, encrypted and accessed only by authorised people.

- ✓ Your health data is encrypted
- ✓ Stored securely with industry best practices
- ✓ Only authorised family members and doctors can access
- ✓ You control who can see your data
- ✓ We follow strict privacy and security controls

2

What are the security features in CareVR?

CareVR is built with multiple layers of security to protect your information.

Encrypted Data Storage

Your health data is encrypted at rest and in transit.

PIN Authentication

Access your account with a secure PIN.

Role-based Access

Different access for Primary, Family, Caretaker and Doctor roles.

Consent Control

You decide who can access your information.

Secure Audit & Monitoring

All access is logged and monitored for safety.

3

What if I forward the invitation to someone else?

Each invitation is unique and can be used only by the person it was meant for.

Your Invite to CareVR

<https://carevr.in/register?...>

Not Allowed

- ! Invitations are single-use.
- ! If you forward the link, the other person will not be able to register.
- ! For access, they need to request their own invitation from the Primary user or the CareVR team.

4

What if I don't accept the invitation within 7 days?

The invitation link is valid for 7 days from the date it is sent.

- ! If you do not accept the invitation within 7 days, the link will expire.
- ! An expired link cannot be used for registration.
- ! You will need to request a new invitation from the Primary user or the CareVR team.

5

What are the upcoming features in CareVR?

We are starting with core features and will be adding more useful features soon.

Voice Recording for Health Data

Record health information using voice.

Coming Soon

Get reminders for health records, assessments and doctor follow-ups.

Coming Soon

Mobile App (Native App)

A dedicated mobile application.

Coming Soon

6

Why is the app being introduced via invitations?

CareVR is currently in a soft launch and is available only through invitations.

- ✓ Helps us maintain a safe and trusted community.
- ✓ Ensures that only authorised family members, caretakers and doctors get access.
- ✓ Allows us to provide a better and more personalised experience.
- ✓ Helps us manage the rollout and onboard users with proper guidance and support.

Thank You
